

# MAX-OUT BASKET Bag Housing Conversion To Cartridge

## *The Cost Effective Approach to Quality Filtration*

Filtration & Membrane Technology, Inc. (FMT) introduces its MAX-OUT BASKET that converts standard bag housings into high efficiency cartridge housings.

The unique design of this non-perforated basket provides for an O-ring positive seal between the basket and housing as well as the cartridge and basket. The MAX-OUT BASKET is designed to fit inside existing bag housings without modifying the filter housing-it is reversible. No welding is required and ASME Code certifications are not compromised. It is available in a variety of materials to meet industry standards and chemical compatibility.

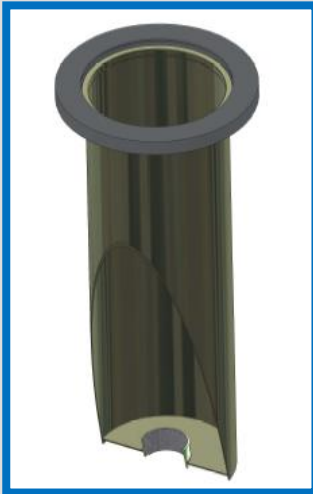

The MAX-OUT BASKET changes the fluid flow path through the filter element from inside-out to outside-in, the entire array of FMT cartridges and filter media are now available for your "bag" applications. MAXIMIZE your existing bag filter housing limitations with this FMT solution that provides optimum performance while minimizing filtration costs. (Separate Data Sheets Are Available Containing MAX-OUT Filter Cartridge Technical Specifications).

## SIMPLE INSTALLATION

Remove Existing Basket

Install MAX-OUT Basket

Install MAX-OUT Cartridge

# MAX-OUT FILTER OPTIONS

## FILTER CARTRIDGES AVAILABLE

### MAX-OUT PLATINUM SELECT

- Standard Length 20"
- Also Available in 28" Length
- 0.5µ-70µ @ 99.98% Efficiency (Beta 5000)
- 0.6µ-60µ @ 99.9% Efficiency (Beta 1000)
- 1µ-70µ @ 99% Efficiency (Beta 100)
- Up To 10 # Dirt Holding Capacity

### MAX-OUT Oil GUZZLER

- 20" Length
- Removes Oil From Water
- <5 PPM Oil Effluent @ 200 PPM Feed
- 3.5 Liters Oil Holding Capacity Per Cartridge
- Automatic Shut-Off When at Full Capacity

## CONSTRUCTION MATERIALS

### FILTER MEDIA

- Cellulose
- Glass
- Polyester
- Polypropylene

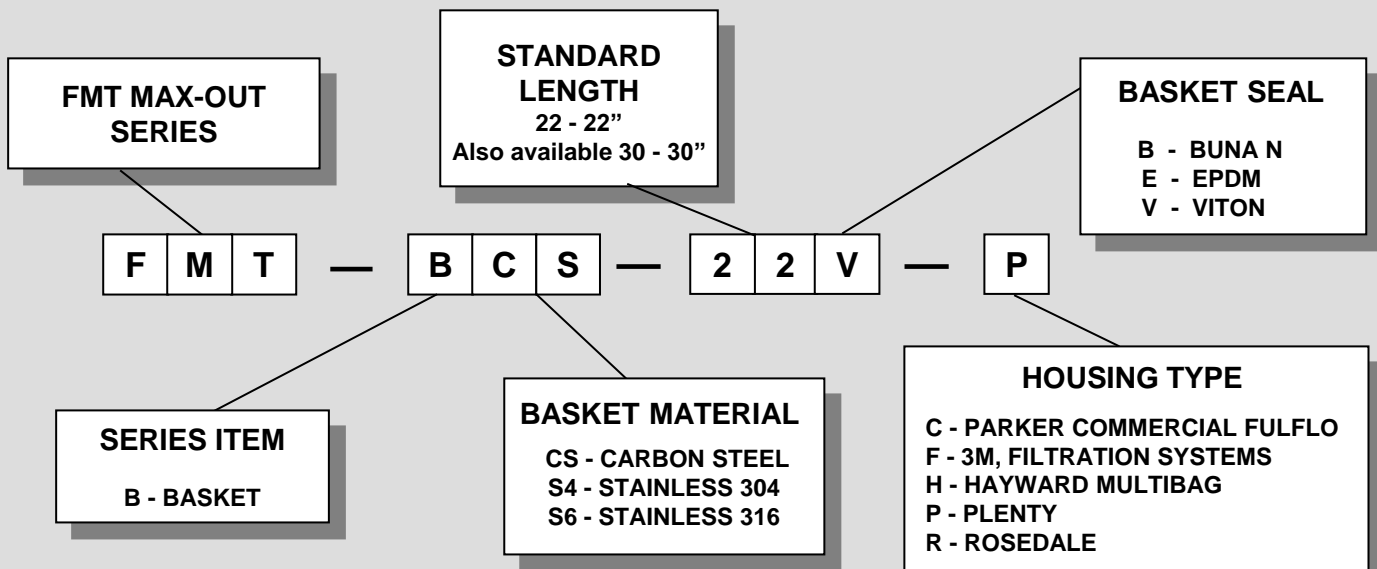

### SUPPORT MATERIALS

- Polypropylene Caps & Cores
- Metal Caps & Cores
- Nylon, Polyester, Polypropylene

### GUZZLER MATERIALS

- Proprietary Absorbent
- Activated Carbon
